DESCRIPTION OF ERRORS CORRECTED

Application No.: 10/599,384
Examiner: Mr Bai D Vu
Art Unit: 2165

As pointed out by Examiner, the following clarification is provided and the following errors are corrected:

- In claim 2, line 11: The word "and" remains underlined. It was purposely added in order to link this "wherein" sentence to the previous "wherein" sentence. Applicant's intention is to affect the writing style of the claim, but not to affect its content.

- In claim 13, line 6: A "," is character where pointed out by Examiner. The phrase now reads "[can be of several types, such as for example,]. Applicant is grateful to Examiner for pointing out this error.

- In claim 27, line 7: The linethrough in the word "codes" is now removed, and the phrase now reads "wherein said plurality of codes [can be of several types, such as for example,]". Applicant is grateful to Examiner for pointing out this error.

In the process of corrections, the following errors were also found, and are also corrected in this claim set.

- In claim 2, line 5: A word "and" was missing when compared to the previous Amendment and it is being added now. The text fragment now reads "[and where it happens that:"

- In claim 32, line 3: The word "of" is a typo, and it should really be "or". This can be seen because its antecedent in line 2 is "by one or more processors of a computer" and also because the word "of" does not make grammatical sense in that position. The fragment now reads "allows said one or more processors".

- In claim 33, line 3: The word "of" is the same kind of type as in the previous error and it is corrected in the same way. The fragment now also reads "allows said one or more processors".
